

**Smokeshield Australia (Smokecloak)
Digital Connections & Security Systems P/L**

Broadcam Australia Pty Ltd has now been in operation for more than ten years. During that time we've grown considerably. Our High Definition department leads the way in the Sydney production equipment hire segment. We are a fully Australian owned company with our main office now located in Artarmon, Sydney.

We stock the latest and most innovative film and broadcast products. The products we choose to sell are high-end production tools which assists today's Directors and Directors of Photography in achieving the visions they aim for.

Naturally having very expensive products we have chosen the ultimate in security systems - **"Smokecloak"**.

We cannot prevent burglars from breaking in but Smokecloak provides total protection for our products.

We have recently installed a range of Smokecloak products into our offices & warehouse and are more than satisfied with the results.

The feedback we have received following a demonstration at our premises in February 2006 for the NSW Fire & Police Services lends credibility to the effectiveness of the Smokecloak system.

Our company has no hesitation in recommending both Smokecloak Australia and the NSW agents for Smokecloak - Digital Connections & Security Systems P/L. Their expertise and knowledge ensures complete protection of our property and therefore enables us to give continued support to our customers. We'd be more than happy to recommend Digital Connections & Security Systems Pty Ltd for any security installations. Their staff are committed and professional in every manner.
