

The IPA 117 siren generates an unbearable noise level of 117dBA providing a simple and efficient solution to deter intruders. It has a tamper-proof steel housing 1.5mm thick and can be installed in as little as 10 minutes.

IPA 117

Presentation

Dimensions 192 x 182 x 62 mm

Weight without internal battery 2 kg

Weight with internal battery 2.8 kg

Colour White

Power

Battery-charging voltage 13.8 - 14,5 VDC

Consumption when alarm is not triggered 5 mA

Consumption when alarm is triggered 1.6 A

Type of internal battery 12 VDC - 2 Ah

Operational time from internal battery when alarm is not triggered More than 36 hours

Operational time from internal battery when alarm is triggered More than 30 minutes

Operation 1 input positive block (+ BL)

Siren blocking voltage 9 - 16 VDC (0.1 mA)

Trigger voltage Less than 4 VDC

Reset voltage More than 9 VDC

Alarm time-out set At 31 minutes

Charging current Limited to 100 mA

The siren is not triggered on power-up as long as the blocking signal has not been applied
